### Sending Letters or Packages to COSMOS Students

- Signature confirmation is by UCSD central mail, extra time is required to deliver to students! When sending mail to the university, all mail and packages goes to the UCSD central mailing office, which signs for packages. When you receive any sort of confirmation it is because they have completed the signature confirmation that your package was delivered. All mail gets sorted and takes a day to distribute, which then gets routed to our on campus office. We then get called and send staff to pick it up and bring to our summer office, distribute to the RAs, who will then give your package to your student. This is a long mailing process, which is why we inform students to bring everything to COSMOS as it takes between 3-4 days before students can receive their mail or packages. This is the same process for all departments on campus.
