Title: IEEE Robo-Magellan
Name: Andrew Chan
Department: ECE
Advisor: Dr. Charles Tu
Sponsors: IEEE San Diego Chapter, Jacobs School of Engineering, US Grants

The poster will contain a brief description and objective of the national competition, our design for the autonomous robot, current status, and plans for the team until competition. The design will include block diagrams of the electronics package, and CADs of the robot chassis and attached components. Status will include what we have achieved, possibly with photos of the design process. Plans will be visualized with a gantt chart and milestones for the team.
