IDEA ENGINEERING STUDENT CENTER

Summer Engineering Institute

JACOBS SCHOOL OF ENGINEERING
UC SAN DIEGO

2019 Community Handbook
...we have the opportunity to take the School to the next level, in terms of research, education and positive impact on society.

- Dean Al Pisano

WHO WE ARE

The Center for Inclusion, Diversity, Excellence, and Achievement (IDEA Engineering Student Center) at the Jacobs School of Engineering is committed to fostering an inclusive and welcoming community, increase retention and graduation rates, and promote a sustainable culture of academic excellence among all engineering students at UC San Diego. Our vision is to provide engineering students with academic support and social engagement that enhances the values of diversity for a global community.

IDEA Engineering Student Center Goals

- Increase retention and graduation rates among our diverse engineering student population
- Provide student-centered services that promote academic success
- Foster a supportive and inclusive environment for all engineering students
- Develop engineering leaders who are civic-minded
MEET THE STAFF

IDEA Engineering Student Center Staff

There are a variety of people who contribute to the success of Summer Engineering Institute. They review participant applications, secure speakers and facilitators, schedule workshops, and so much more. The Director of Operations, Student Program Coordinator, and IDEA Center Coordinator are available to assist you throughout the program.

What is the Summer Engineering Institute?

The Summer Engineering Institute (SEI) is for incoming first-year undergraduate students who have been admitted to an engineering major at UC San Diego’s Jacobs School of Engineering. This program provides incoming students with the opportunity to become acclimated to campus life, build skills and habits necessary for success in engineering, and develop a community among peers before beginning their courses in the fall.

The Summer Engineering Institute is a 5-week program, starting at 9:00am on Saturday, August 3rd and ending at 12:00pm on Saturday, September 7th. Participants will live on campus throughout the duration of the program in a residential hall. Undergraduate Peer Facilitators live with participants.
throughout the program and serve as their peer mentors and guide community development. As participants of SEI, students will:

- Earn 6 credits towards their engineering degree
- Receive support in making the transition from high school to the rigors of a university-level engineering curriculum
- Participate in academic, technical, and professional workshops and seminars
- Build awareness of relevant campus programs and resources
- Begin forming a peer network and make lasting friendships

**Key Experiences During the Summer Engineering Institute**

**COMMUNITY**
- Interaction with fellow engineering students
- Participation in social and community activities
- Experience using dining halls and living in campus residence halls

**ACADEMIC PREPARATION**
- Enrollment in 6 course credits
- Attendance at academic/technical workshops
- Exposure to campus academic resources

**INSPIRE ENGINEERING**
- Meet with current engineering students, both undergraduate and graduate, staff and faculty
- Hands-on engineering projects
- Develop professional skills

**Move-In and Move-Out**
Student(s) check-in on Saturday August 3, 2019 between 9:00am – 4:00pm and check-out on Sunday, September 8th, 2019 by 12:00pm. All students are required to check-out of the residential halls by 12:00pm.

**A Community of Engineers**

**ACADEMIC COURSEWORK**
All SEI participants take: ENG 10: Fundamentals of Engineering Applications where they develop and apply mathematical skills while working in teams to solve practical engineering problems.

Participants also select one 4-credit course from their engineering major:
- MAE 8: MATLAB Programming for Engineering Analysis
COMMUNITY BUILDING PROGRAM
One of the major goals of SEI is to foster a sense of community and support among all participants. Our Community Building Program includes numerous social and team building activities with your Peer Facilitators, where you will be expected to fully engage, in order to accomplish these goals. We challenge you to step out of your comfort zone. As participants get to know each other, they will grow closer together and establish lasting friendships. Students can refer to the weekly event schedule, which will be provided to them during the first week of SEI.

SECTION 3: RESIDENTIAL LIFE

Emergency Procedures

Locked Out?*

<table>

</tr>
</tbody>
</table>

*Each student receives 3 free lock-outs per academic year. After the third lock-out, students will be charged $10 per each subsequent lock-out

Revelle Office of Residence Life
Location: Northeast corner of Blake Hall, first floor.
Hours of Operation: Mon – Fri: 8AM – 12PM and 1PM – 4:30PM
Phone: 858-534-3025

Maintenance
For Non-Emergency Maintenance: Submit a “Fix-It” request at https://hds.ucsd.edu/sso/fixit/
For Emergency Maintenance: Call 858-534-2600
(More info about maintenance can be provided by RA on duty.)

In case of life threatening, medical, or security emergencies call the police at (858)534-4357.
Peer Facilitators

Peer Facilitators are current undergraduate students, majoring in engineering, who will serve as your peer leader, mentor, and guide for the duration of the program. Each Peer Facilitator will be directly responsible for around 14 students. They will live in the same building, and they will have direct contact with all students in the program during programs and activities.

Activities that Peer Facilitators will be involved in include, but are not limited to, the following:

- Support, supervise and mentor students participating in SEI;
- Lead and guide participants through scheduled activities;
- Develop, coordinate and implement nightly and weekend community building activities for participants;
- Set a standard of communal and individual behavior among participants;
- Live in apartments as assigned with participants throughout SEI;
- Establish relationships of respect and trust with participants and program staff;
- Serve as role models for participants and set an example by abiding by all regulations and policies of the IDEA Engineering Student Center, Revelle Residential Life, and UC San Diego;

The Peer Facilitators are going to be one of your main resources. Please feel free to ask them questions pertaining to the UC San Diego campus, engineering student resources, information on their major, campus life and organizations/programs they are involved with, and other similar topics.

HERE are your Peer Facilitators!

Housing and Amenities

**RA on Duty**
All apartments have a designated Residential Assistant (RA). These individuals are the first point of contact for housing concerns. This means any issues with the apartment space as well as getting locked out. Additional information can be found on the “Welcome Move-In” e-mail sent by Revelle Res Life.

**ROOMS AND ROOMMATES**
SEI participants will be housed in the Revelle Apartments 1 in the North tower. Five to six students will share a suite, which contains separate single and double rooms with a shared restroom, kitchen, and living room or suite. The following services are also included: housekeeping, utilities (water, electricity, and gas), trash and recycling services, onsite laundry facilities, and security services.

Keep your room clean. It is your responsibility to make sure your bedroom and suite door is locked at all times. The University is not responsible for any lost or stolen items. Keep your keys and/or access cards safe: you will be billed the applicable fee (minimum of $155) if they are not returned at time of check-out. Upon check-out furniture in the room must be left in the same set-up as upon check-in. Additional information about what is provided for housing can be found in the “Welcome Move-in” e-mail sent by Revelle Res Life.

Should a conflict with a roommate arise, please talk with your roommate first. Most conflicts can be resolved with honest discussion and compromise. If conflicts persist, talk with your Peer Facilitator. They may offer solutions and act as a mediator for you and your roommate. The Peer Facilitator will request input from the IDEA Center Student Program Coordinator or
Director of Operations to obtain further input, if a compromise cannot be found.

**MEALS**

You will be provided with a dining plan associated with your student ID card. Each student will receive 3 meal swipes per day. These swipes can be used at anytime throughout the day, but only 3 swipes are permitted within 24 hours. The time and location of most of your meals will be decided by you with a few exceptions based on program activities.

Lost student ID cards also means lost dining credits. Replacement student IDs cost $15 and can be made on the 3rd floor of the Student Services Center.

Suggested meal locations that accept dining credits can be found in the table below and additional information can be found on the HDH website [https://hdh.ucsd.edu/DiningMenus/](https://hdh.ucsd.edu/DiningMenus/).

**Tips for a Successful Summer Engineering Institute Experience**

The Summer Engineering Institute is an opportunity for you to academically prepare for the rigor of engineering studies. We provide you with information and resources that will aid in your transition from high school to college, as well as a community that will support you throughout your engineering experience at the Jacobs School.

**Homesickness is REAL: Take care of yourself**

It is not uncommon to become homesick after arriving on campus. You are adjusting to a new schedule, a new environment, and new friends. Look after one another and review these strategies for overcoming homesickness.

1. **Make a Bucket List** - Do research about your new home and find places you want to explore. For example, all the coffee carts
at UCSD or adventure into La Jolla and see the sea lions in La Jolla Shores. Make a list of these places and activities and challenge yourself to do them before the program ends. This will give you something fun to do and keep you focused on the next activity, instead of dwelling on what’s happening at home.

2. **Work on Being Positive** - Of course, this can be a lot easier said than done. But making a concerted effort to carry a positive attitude can help with homesickness. We encourage you to plan activities you enjoy doing and look forward to, whether it’s hanging out with friends or watching a show you enjoy. That said, if you are struggling, connect with a full-time staff.

3. **Take a Break from Social Media** - FOMO is a real thing, and it can be brutal. Social media has made it easier than ever to keep track of what everyone is doing, even down to what people ate for lunch. It can be hard to tear yourself away from those updates and photos but it may actually be making your homesickness worse. Instead of following a person’s every movement, focus on finding content for some exciting posts of your own.

---

**SECTION 4: STUDENT CODE OF CONDUCT**

**Participant Expectations**

As an SEI participant, you must adhere to the following agreements:

1. I will fully engage in all activities during the Summer Engineering Institute. This includes attentiveness during classes, labs, workshops, active participation in group discussions, and mindful respect for other participants, current UC San Diego students, and UC San Diego staff.

2. I will not leave the UC San Diego campus for any reason during the duration of the program without providing prior notification to staff. I understand that, upon my absence from SEI, my emergency contact will be contacted and I may be dismissed from the Summer Engineering Institute.

3. In the event that I do choose to abandon the program and/or leave the campus, I will not hold UC San Diego responsible for any damages that may occur.

4. I understand that unless there is an emergency situation, my health insurance carrier will be used whenever possible for my medical needs. In the event of an accident or
illness, I authorize UC San Diego staff to take steps to provide me with first aid.

5. I will uphold all policies set forth by the Summer Engineering Institute Coordinating Staff, UC San Diego staff, and outlined by the UCSD Principles of Community.

**Attendance Policy**

Our program maintains a firm 100% attendance policy, with students expected to attend all classes, labs, discussion sections, and participate in daily activities with other SEI participants, faculty and staff, both academically and socially. Students may not leave the campus throughout the duration of the program without prior notification. If an emergency arises requiring a student to depart Summer Engineering Institute for any period of time, contact the IDEA Engineering Student Center immediately by calling 858-534-6105 during office hours, Monday to Friday, 8am-4:30pm OR your Peer Facilitator.

**Rules and Safety Regulations**

Throughout Engineering Institute, you are expected to abide by the UC San Diego “Rules and Safety Regulations” (Refer to Exhibit A).

**Alcohol and Other Drugs**

Being under the influence or in possession of alcoholic beverages, tobacco products, illegal substances, non-prescribed drugs, and/or drug paraphernalia of any type is prohibited. The use of any prescribed medication, over the counter drugs, and other controlled substances in an abusive manner is prohibited. This includes cannabis related products.

**Smoking**

UC San Diego is a non-smoking facility. Smoking is NOT permitted in any indoor area or within twenty-five (25) feet of doorway, entryway, operable window or ventilation intake duct to any facility owned or leased by UC SAN DIEGO a fee of $100.00 per room will be added to the final master invoice to cover additional cleaning and rehabilitation of any room where smoking occurred.

**Dress Code**

Inappropriate clothing includes undergarments worn over or as clothing, clothing with profanity or advertisements for alcohol, drugs, or tobacco products, excessively baggy, low-cut, or overly-revealing clothing.
Identification Badges
All SEI participants will be issued an identification (ID) badge and lanyard at program check-in. The Summer Engineering Institute ID badge MUST be worn between the hours of 7:00am and 11:00pm whenever outside of a residence hall. Replacement badges may be requested at the IDEA Engineering Student Center or by talking with your Peer Facilitator. It is essential that this ID badge and lanyard be worn and visible at all times, both on campus and off campus field trips (unless otherwise instructed by the Peer Facilitators), through the first three weeks of SEI.

Phone Use During Engineering Institute
Phone lines will not be provided in student rooms during the Summer Engineering Institute. Cell phones are permitted, but their use during class and SEI workshops and activities is strictly prohibited.

Gambling:
California Law forbids the dealing, playing, conducting, betting on, and providing facilities for games involving cards, dice, and other devices for money, checks, credit, or other representation of monetary value on state property. As such, gambling in or around the residential facilities is illegal and thus prohibited.

Additional Rules:
Public Display of Affection (PDA), is not permitted during SEI.

Theft: Never assume that items in your suite or lounge area are for common use. Theft is prohibited and borrowing without permission is disrespectful and cause for suspicion/investigation.

Verbal, Physical, or Electronic/Cyber abuse of another person, particularly on the basis of their race, gender, sexual orientation, national origin, disability, or other individual or group characteristic is clearly prohibited. Intentional abuse of others in a manner which would reasonably cause or potentially cause another individual physical or psychological harm will not be tolerated.

SECTION 5: ADDITIONAL RESOURCES
Frequently Asked Questions
Q: Can I change my current major to a different engineering major?
A: Note that all engineering majors are “capped,” meaning that the number of spots for incoming students is limited. Therefore, changing to a capped major is difficult. Each department has an application process for the change. You should meet with the Academic Advisor from the engineering department you are interested in to discuss changing your major.

Q: Can I change colleges?
A: Students who accept the offer of admission should assume that they will remain in the college to which they were admitted. Changing colleges is rare and quite difficult.

Q: Can I double major or major/minor?
A: You can double-major in an engineering and NON-engineering major. You CANNOT double major in two engineering majors. Similarly, you can major/minor in an engineering major and a non-engineering minor. Some common combinations are engineering/math, engineering/economics.

Q: Can I study abroad as an engineer?
A: Yes! There are several programs that encourage students to go abroad and gain professional and academic experience.

The Programs Abroad Office (PAO) can help you research opportunities and programs that fit into your engineering schedule. You can visit http://icenter.ucsd.edu/pao/ to view all of the options available.

Q: How long will it take me to graduate as an engineer?
A: The average graduation time for a UCSD engineer is 4 years and 1 quarter. If you map your schedule out right and work with your academic advisors, you can plan your academic years to finish in 4. Keep in mind though, if you decide to double major, major/minor, miss a prerequisite for a series, etc. this can delay your degree completion time. This is why it’s important to stay in touch with your academic advisors!

Q: What kind of internship/job connections are there for engineers?
A: The Jacobs School has a very robust industry partner program. These companies come to campus regularly to recruit our engineers and host professional development talks and workshops that will help get you the job you are dreaming of! Through programs like TIP, the Jacobs School’s Job/Internship Bulletin, and the Career Services Center, engineers are sure to make the connections necessary for job success during and after college.

The Jacobs School’s Team Internship Program (TIP) is one of the first of its kind in the country. TIP sends multi-disciplinary teams of students to our industry corporate sponsors to address engineering
projects which they have devised. These generously paid, full-time summer internships are placed across California, out-of-state, and even overseas. Visit http://www.jacobsschool.ucsd.edu/TIP to learn more.

**Q: Where can I go see my academic advisors?**

**A:** As a student at UCSD you have two sets of advisors.

Your college advisor is the advisor who can help you with your college General Education courses. Below is information for each college. You can also contact your advisor through the Virtual Advising Center (VAC) accessible via your TritonLink account.

- **Revelle VAC** 858-534-3490
- **Muir VAC** 858-534-3580
- **Marshall VAC** 858-534-4110
- **Roosevelt VAC** 858-534-9864
- **Warren VAC** 858-534-4350
- **Sixth VAC** 858-534-1481

Your major/department advisor. Your department advisor can help you with the specifics of your major like classes, prerequisites, labs, etc. You can also contact your department advisor through VAC.
