## Welcome Brain Corp TIP Team

# Mission-Based Autonomy

By: Mohak Vaswani and David Wang

# Introduction

David Wang  
Cloud Team

Mohak Vaswani  
Robot Application Team

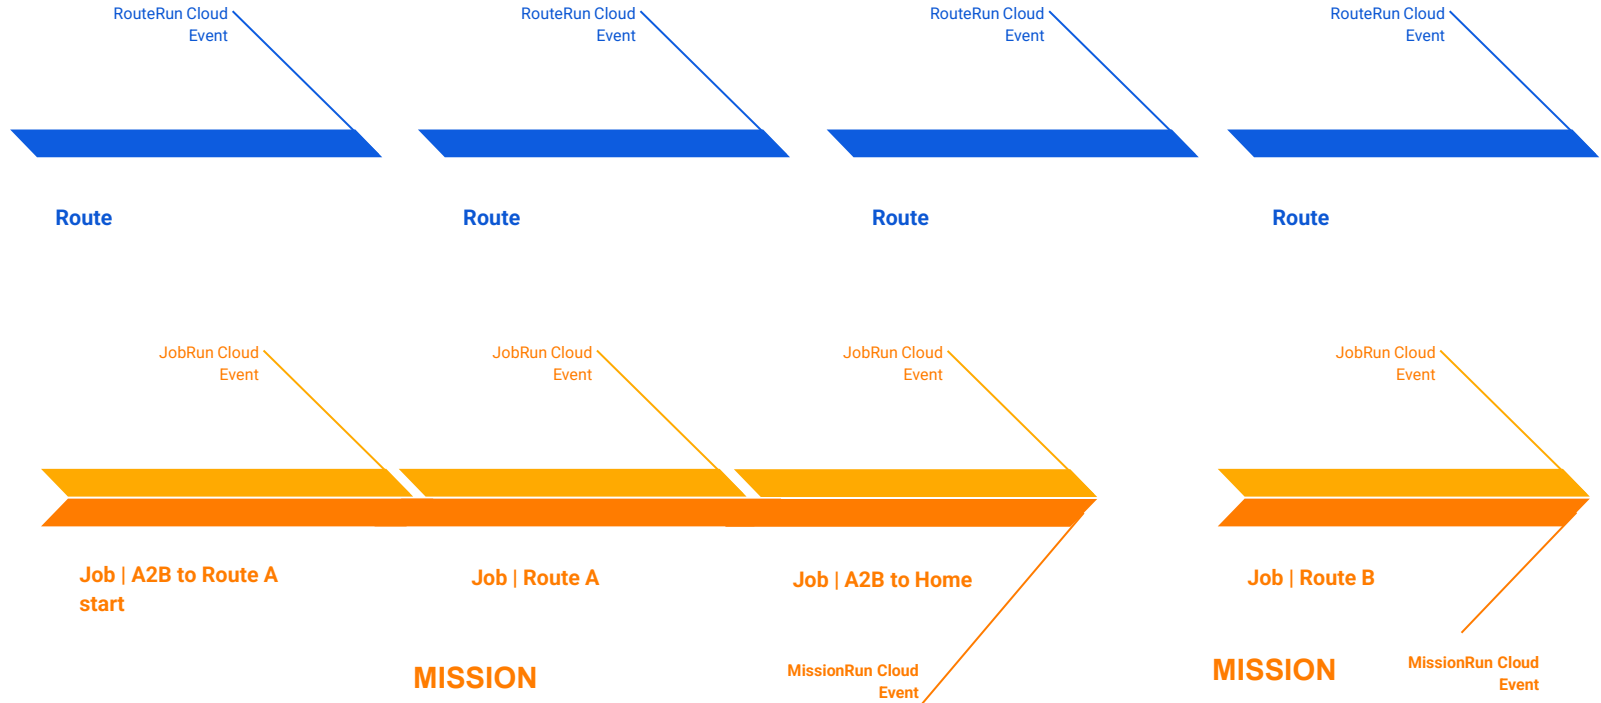

# What is Mission Based Autonomy (MBA)?

## MBA enables:

- Moving away from the traditional teach and repeat
- Scheduled and AdHoc missions
- GoTo (home, point-of-interest, poses)
- Spot-Clean
- Docking / Undocking
- Re-clean/re-scan skipped areas
- Enhanced Reporting (grouping routes into missions)
- *...and more!*

# Mission Based: Old vs New

# Introducing: Snackbot (Botler)

- MBA Proof of Concept
- A2B and route run capabilities
- Can hold snacks
- Joint project between the Cloud Team and the Apps team

# One sec, I'm thirsty

# Limitations and Future improvements

- Can't schedule mission
  - ex: I want Doritos at 2 pm
- Multiple requests sent get treated as a single mission, causing reporting issues on the cloud side
- A Wait Job that waits until a command is passed to resume the robot

# What we learned

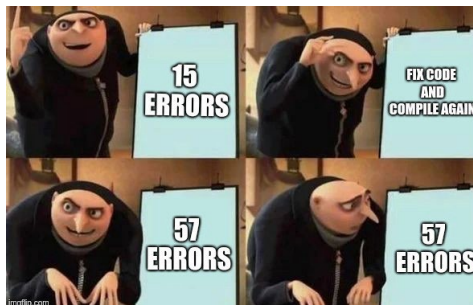

## Technical Stuff

- Cloud architecture
  - GCP, Firestore, BigQuery
- Robot's application layer architecture
  - Events, commands, ticks, workflows, state machines
  - Real-life use of what we learned in School
- There are more edge cases than meets the eye
- Change anything, change everything
- Usage of different tools that can help you formulate ideas and see them to completion
  - Mind Maps and Flowcharts

## Life Stuff

- Plan things out, but don't get too attached
- Cross-collaboration
- Day-to-day progress is variable
  - long-term outlook is what matters most
- Ask questions
  - all of them

# Acknowledgement

A huge thank you to:

- Brain Corporation
- Our Mentors, Nick Tripp and Tony Kinsley
- Mission Based Autonomy Team
- To everyone who helped make this project possible
