Dean, UC San Diego Jacobs School of Engineering

Special Adviser to the Chancellor

DISTINGUISHED GRADUATING STUDENT SPEAKER

Kiran Kumar

B.S. Bioengineering (Biotechnology)

AWARDS FOR EXCELLENCE

DISTINGUISHED ALUMNI ADDRESS

Brandon C. Marin, PhD

Chemical Engineering '17, Intel Corp, Jacobs School Distinguished Alumni

HISTORY OF THE ORDER

RECITATION OF THE OATH

RECOGNITION OF GRADUATING CLASS

CLOSING REMARKS

Letter from the Dean

On behalf of the UC San Diego Jacobs School of Engineering, I would like to congratulate the Class of 2024. You are graduating with a degree from one of the top engineering and computer science schools in the country. This is no small feat and represents many hundreds of hours of effort. Well done!

In addition, I'm honored to recognize each and every person who has helped raise, educate, mentor, support and inspire our graduates. This is incredibly important work that too often goes unrecognized. I'd like to add a special congratulations to our annual award winners. It takes a great deal of effort, commitment, and patience to inspire change within our campus community. Thank you for all your contributions, and congratulations to each of you!

It is my hope that you put the skills you've learned at the Jacobs School to practice in industry careers or graduate school, you remember to "find your why." Returning to your "why" will keep you motivated to solve the toughest challenges facing society. No matter where you land in your careers, I challenge you to bring engineers and computer scientists to the table as early as possible in every project. This is critical for developing sustainable solutions that actually scale.

And remember, it's always about the people, I hope you've experienced that here at the Javobs School, the largest undergraduate engineering school in California. We train a culturally and economically diverse student body, preparing our students to become the technology leaders that companies, government institutions, and other organizations in San Diego, California and the nation need in order to thrive. Our graduates have applied their passions and dedicated themselves to improving the world through engineering and computer science. I look forward to a bright and fulfilling future for each of you.

You now join the large and prestigious group of Jacobs School of Engineering alumni. They are CEOs, astronauts, nonprofit founders, politicians, and technical leaders in every industry, from batteries to biotech and everything in between. As new alumni, I invite you to remain engaged and find ways to share you wisdom to help future Jacobs School students succeed.

I am honored to be serving as Dean of the Jacobs School of Engineering, which is truly a world-class institution for education, research, innovation, and positive impact on society. We advance engineering and camputer science to create scalable solutions for the public good. As our newest Jacobs School of Engineering alumni, I look forward to working with you on these critical efforts..

ALBERT P. PISANO, PH.D.
Dean, Jacobs School of Engineering
Special Adviser to the Chancellor for Campus
Strategic Initiatives
UC San Diego

ABOUT THE CEREMONY

The Ring Ceremony is meant to foster a spirit of pride, individual integrity, and responsibility in all disciplines of engineering. It is a bridge between education and practice. As part of this ceremonial rite of passage, graduates accept and recite the Jacobs School of Engineering Oath. The Oath serves as a reminder of the values imbued in each graduate through their experiences at UC San Diego and encourages them to uphold standards in ethics, integrity, and quality as practicing engineers. Each graduate will receive an engraved ring to be worn on the fifth finger of their dominant hand so that it makes contact with anything they sign their name to--a constant reminder of the Oath they swore to.

ABOUT THE AWARDS

Department Awards for Excellence are presented to students in the engineering community who have been recognized for their outstanding leadership and exemplary service. The primary promise of the award is to honor those who earned the admiration of the engineering community for their contribution to and impact on university life.

AWARDS FOR EXCELLENCE

Alessia Welch

Computer Science and Engineering

Lucas Grinius

Mechanical and Aerospace Engineering

Liana Wong

Structural Engineering

OATH OF THE JACOBS SCHOOL OF ENGINEERING

As a graduate from the Jacobs School of Engineering
I pledge to use my knowledge for the public good
to innovate for the advancement of humanity
and to be accountable to future generations.

As a member of the engineering community
I dedicate myself to lifelong learning
and to the growth of my field.

I promise to always conduct myself with honor
and uphold the strong ethical values
instilled in me by the Jacobs School.

I accept this ring as a symbol of this oath.
