How we do it

When we collaborate with industry, government and academia, we actually listen.

The result: deep interactions and bold collaborations within UC San Diego’s $1.35 Billion research enterprise, throughout San Diego’s growing tech ecosystems, across California, and beyond.

We are a top ten engineering school with the creativity and openness necessary to tackle the toughest shared challenges for the public good.

How we solve the tough challenges no lab, discipline, or company can take on alone.

We are transforming engineering education, at scale.

How we do it

Hands-on undergraduate education all four years, team-based internships, vast research opportunities that often cross disciplines, world-class maker studios, bold student-led engineering teams, a dynamic entrepreneurship ecosystem, and more.

We empower one of the largest cohorts of undergraduate students in the nation to apply theory to real-world problems.

## #9 Engineering School in the USA
(U.S. News Rankings of Best Engineering Schools; March 2020)

### ACADEMIC DEPARTMENTS

#### BIOENGINEERING
- autodigestion
- bioinformatics
- biomaterials / biomechanics
- cell / tissue mechanics
- biophotons / biosensors
- cardiac mechanics
- cardiovascular engineering and imaging
- cartilage / tissue engineering
- genomic engineering
- metabolic bioengineering
- microcirculation / transfusion medicine
- molecular / cellular bioengineering
- nanotechnology
- neuroengineering
- regenerative medicine / stem cells
- systems bioengineering
- translational bioengineering

<table>
<thead>
<tr>
<th>Faculty</th>
<th>Undergraduates</th>
<th>Graduate students</th>
</tr>
</thead>
<tbody>
<tr>
<td>31</td>
<td>580</td>
<td>339</td>
</tr>
</tbody>
</table>

#### MECHANICAL & AEROSPACE ENGINEERING
- aerospace technologies
- biomaterials, bio-inspired tech
- cell / membrane mechanics
- control and optimization
- combustion
- high-energy materials processing
- materials for extremes
- medical device technologies
- MEMS for extremes
- networked control systems
- renewable and carbon-neutral energy technologies
- robotics and design
- solid and soft matter mechanics of metamaterials
- thermo-physics, heat and mass transfer
- tribology for memory storage
- turbulence, geophysical flows, macro/microfluidic flows

<table>
<thead>
<tr>
<th>Faculty</th>
<th>Undergraduates</th>
<th>Graduate students</th>
</tr>
</thead>
<tbody>
<tr>
<td>52</td>
<td>1,170</td>
<td>537</td>
</tr>
</tbody>
</table>

#### COMPUTER SCIENCE & ENGINEERING
- artificial intelligence / machine learning
- bioinformatics
- computer architecture
- computer science pedagogy
- databases and info mgmt.
- embedded systems, VLSI/CAD
- graphics and vision
- human-computer interaction
- programming languages
- robotics
- security and cryptography
- software engineering
- systems and networking
- theoretical computer science

<table>
<thead>
<tr>
<th>Faculty</th>
<th>Undergraduates</th>
<th>Graduate students</th>
</tr>
</thead>
<tbody>
<tr>
<td>67</td>
<td>1,933</td>
<td>873</td>
</tr>
</tbody>
</table>

#### NANOENGINEERING
- advanced nanomaterials
- computational materials science
- nanobiotechnology
- nanomanufacturing
- nanomedicine
- nanophotonics
- nanorobotics
- nanosensors
- nanotechnologies for energy storage and conversion
- stretchable, flexible electronics
- sustainable nanoeengineering
- wearable devices

<table>

#### ELECTRICAL & COMPUTER ENGINEERING
- applied electromagnetics
- bioinformatics / bionanotech
- brain imaging / mapping
- communications systems
- cyber-physical systems security
- electronic circuits / systems
- embedded systems
- intelligent systems / robotics
- machine learning and data science
- magnetic and optical storage
- medical devices and systems
- nanoelectronics
- network infrastructure
- neural interfaces
- photonics / nanophotonics
- signal/image/video processing
- systems energy engineering
- wearable sensors

<table>
<thead>
<tr>
<th>Faculty</th>
<th>Undergraduates</th>
<th>Graduate students</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>1,279</td>
<td>1,094</td>
</tr>
</tbody>
</table>

#### STRUCTURAL ENGINEERING
- aerospace structures / aviation safety
- biomechanics
- composites / nanomaterials
- computational fluid-structure interaction analysis
- computational mechanics for extreme events damage prediction
- earthquake engineering and infrastructure renewal
- geotechnical engineering / geomechanics
- large-scale experimental research
- multi-hazard mitigation for earthquakes, blasts and more
- risk analysis / visualization / optimization
- structural health monitoring / nondestructive evaluation
